	Special Note: MSDS data pertains to the product as dispensed from conditions of use (diluted) so long as prescribed safety precautions are Acute Effects of Overexposure: Eye irritant. Eye contact may produce stinging, burning, inflammation, and in respiratory tract. Accumulation of harmful quantities of vapor is preceded by effects, including flushing, headache, dizziness, and nausea. Chronic Effects of Overexposure: Repeated or prolonged, skin contact may produce some dryness of skin. repeated contact, which is usually precluded by irritation. In most extreme ca carcinogens by IARC, NTP, or OSHA.	n extreme cases may produce corneal damage. Exposure may be irritating to skin, and upper a severe irritation which makes overexposure unlikely. Overexposure can result in mild narcolic Chronic effects from alcohol vapors are rare and would result from severe, prolonged, and ases, narcosis, unconsciousness, and death could result. None of the ingredients are listed as		
	Est'd PEL/TLV: Not established HMIS Codes: HEALTH 1;FLAM. 2;REACT. 0;PERS. PROTECT. B ;CHRONIC	Primary Routes of Entry: Inh.		
	FIRST AID PROCEDURES:     Skin:   Flush contaminated skin with plenty of water. Consult a physician if irritation develops.     Eyes:   Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting upper and lower lids. Get medical attention at once.     Inhale:   Move excosed person to fresh air. If irritation persists, get medical attention promptly.     Ingest:   If this product is swallowed, do not induce vomiting. If victim is conscious give plenty of water to drink. Get medical attention at once.     SECTION IV - SPECIAL PROTECTION INFORMATION     Protective Clothing:   The use of neoprene, nitrile or natural rubber gloves is strongly recommended, especially for prolonged contact.     Use of tight-fitting safety glasses or göggles is strongly recommended, especially when wearing contact lenses.     Respiratory Protection:   It ventilation is inadequate, wear a properly litting MSHA or OSHA-approved respirator.			
	Eyes:     Immediately flush eyes with plenty of water for at least 15 minutes.       Inhale:     Move exposed person to fresh air. If irritation persists, get medical a lingest:       Ingest:     If this product is swallowed, do not induce vomiting. If victim is constrained on the swallowed, do not induce vomiting. #### MATERIAL SAFETY DATA SHEET PAGE 2 ZEP MANUFACTURING COMPANY

SECTION VII - REACTIVITY DATA

Stability: Incompatibility (avoid): Polymerization: Hazardous Decomposition:

Heat, open flame, spark, and oxidizing agents

Stable

Will not occur

Carbon dioxide, carbon monoxide, and other unidentified organic compounds

# SECTION VIII - SPILL AND DISPOSAL PROCEDURES

# Steps to be Taken in Case Material is Released or Spilled:

Immediately eliminate all flame, ignition and high-heat sources. Observe safety precautions in sections 4 & 9 during clean-up. Absorb spill on inert absorbent material (eg Zep-O-Zorb). Pick up and place residue in a suitable waste container or, if permitted, flush to sewer. Thoroughly flush area with water

Waste Disposal Method:

Waste bisposal werrou. Liquid waste are not permitted in landfills. This product is not considered a hazardous waste under RCRA. Unusable liquid may be absorbed on an inert absorbent material (eg. Zep-O-Zorb), drummed, and taken to a chemical or industrial landfill. In some areas disposal by flushing into a sanitary sewer with plenty of water may be permissible. Consult local, state, and federal agencies for proper disposal method in your area.

# **RCRA Hazardous Waste Numbers: N/A**

## SECTION IX - SPECIAL PRECAUTIONS

# Precautions to be Taken When Handling and Storing:

Flammable! Store and use away from heat, sparks, open flame, and any source of ignition. Store tightly closed container in a dry area at temps, between 40-120 degrees F. Do not breathe spray mists or vapors. Keep product out of eyes. Avoid prolonged contact with skin. Clothing or shoes which become contaminated with substance should be removed promotiv and not reworn until thoroughly cleaned.

# SECTION X - TRANSPORTATION DATA

DOT PROPER SHIPPING NAME Small sizes one gallon or less may be shipped as ORM-D: NONE DOT Hazard Class: N/A DOT Label/Placard: NONE DOT LD. Number: N/A

EPA TSCA Chemical Inventory: ALL INGREDIENTS ARE LISTED

EPA CWA 40CFR Part 117 substance (RQ in a single container) NONE

Thank you for your interest in, and use of, Zep products. Zep Manufacturing Co. is pleased to be of service to you by supplying this Material Salety Data Sheet for your files. Zep Manufacturing is concerned for your health and safety. Zep products can be used safely with proper protective equip-ment and proper handling practices consistent with label instructions and the MSDS. Before using any Zep product, be sure to read the complete label and the Material Safety Data Sheet.

As a further word of caution, Zep wishes to advise that serious accidents have resulted from the misuse of "emptied" containers, "Empty" containers retain residue (liquid and/or vapor) and can be dangerous. DO NOT pres-(inditional of value) rate can be dangerous to Not pres-surize, cut, weld, braze, solder, drill, grind or expose such containers to heat, flame, or other sources of ignition; they may explode or develop harmful vapors and possibly cause injury or death. Clean empty containers by triple rinsing with water or an appropriate solvent. Empty containers must be sent to a drum reconditioner before reuse:

# TERMS AND ABBREVIATIONS USED IN THE MSDS: BY SECTION ALPHABETICALLY:

# SECTION II: HAZARDOUS INGREDIENTS

CAR: Carcinogen - A chemical listed by the National Toxicol-ogy Program (NTP), the International Agency for Research on Cancer (IARC) or OSHA as a definite or possible human ancer causing agent. CAS #: Chemical Abstract Services Registry Number - A

universally accepted numbering system for chemical sub-Tonres

CBL: Combustible - At temperatures between 100°F and 200°F chemical gives off enough vapor to ignite if a source of ignition is present as tested with a closed cup tester CNS: Central Nervous System depressant reduces the activ-

ity of the brain and spinal cord. COR: Corrosive - Gauses irreversible alterations in living

issue (e.g. burns).

DESIGNATIONS: Chemical and common names of hazardous ingredients EIA: Eye Irritant Only - Causes reversible reddening and/or

inflammation of eye tissues. EXPOSURE LIMITS: The time weighted average (TWA) air-

borne concentration at which most workers can be exposed without any expected adverse effects. Primary sources include ACGIH TLV's, and OSHA PEL's (TWA, STEL and ceiling limits)

ACGIH: American Conference of Governmental Industrial

ACOM, American commence of devicements Hygienisis. CEILING: The concentration that should not be exceeded in the workplace during any part of the working exposure. OSHA: Occupational Safety and Health Administration PEL: Permissible Exposure Limit- A set of time weighted interaction of the set of time weighted.

PEL Permissible Exposure Limit. A set of hime weighted average exposure values, established by OSHA, for a normal 8-hour day and a 40-hour work week PPM, Parts per million - unit of measure for exposure

limits (S) SKIN: Skin contact with substance can contribute to

overall exposure. STEL: Short Term Exposure Limit- Maximum concentration

Notice Revised 8/91)

NOTICE

for a continuous 15-minute exposure period. TLV: Threshold Limit Value - A set of time weighted aver-age exposure itmits, established by the ACGIH, for a normal 8-hour day and a 46-hour work week. FBL: Flammable - At temperatures under 100°F, chemical

gives off enough vapor to ignite if a source of ignition is present as tested with a closed cup tester. HAZARDQUS INGREDIENTS: Chemical substances deter-

HALAHDOUS INGHEDIENTS: Chemical substances deter-mined to be potentical health or physical hazards by the oriteria established in the OSHA Hazard Communication Standard - 29 CER 1910.1200 HTX: Highly toxic - the probable lethal dose for 70 kg (150 ib.) main and may be approximated, as less than 6 teaspoons (2 tablespoons). IRR: Hiritant - Causes reversible effects in living tissues (e.g.

inflammation) - primarily skin and eyes. N/A: Not Applicable - Category is not appropriate for this

product. ND: Not Determined - Insufficient information for a deter-

mination for this item.

 ATECS#: Registry of Toxic Effects of Chemical Substances
an unreviewed listing of published toxicology data on chemical substances.

SARA: Superfund Amendments and Reauthorization Act -Section 313 designates chemicals for possible reporting for

Toxics Release Inventory. V. Sensitizer - Causes allergic reaction after repeated SEN

exposure TOX: Toxi Toxic - The probable lethal dose for a 70 kg (150 lb.) man is one punce (2 tablespoons) or more.

# SECTION III: HEALTH HAZARD DATA

ACUTE EFFECT: An adverse effect on the human body from a single exposure with symptoms developing almost imme-diately after exposure or within a relatively short time. CHRONIC EFFECT: Adverse effects that are most likely to

occur from repeated exposure over a long period of time. EST/D\_PEL/TLV: This estimated, time-weighted average, ex-

posure limit, developed by using a formula provided by the ACGIH, pertains to airborne concentrations from the product as a whole. This value should serve as guide for providing sale workplace conditions to nearly all workers. HMIS CODES: Hazardous Material Identification System

rating system developed by the National Paint and Coating Association for estimating the hazard potential of a chemi-cal under normal workplace conditions. These risk estimates are indicated by a numerical rating given in each of three hazard areas (Health Flammability/Reactivity) ranging from a low of zero to a high of 4. A chronic hazard is indicated with a yes, Consult HMIS training guides for Personal Protection letter codes which indicate necessary protective auioment

PRIMARY ROUTE OF ENTRY; The way one ardous ingredients may enter the body and cause a general-ized-systemic or specific-organ toxic effect. ING: Ingestion - A primary route of exposure through

swallowing of material

INH: Inhalation - A primary route of exposure through breathing of vapors.

SKIN: A primary route of exposure through contact with

the skin.

SECTION IV: SPECIAL PROTECTION INFORMATION

Where respiratory protection is recommended, use only MSHA and NIOSH approved respirators and dust masks.

MSHA: Mine Safety and Health Administration NIOSH: National Institute for Occupational Safety and Health

#### SECTION V: PHYSICAL DATA

EVAPORATION RATE: It refers to the rate of change from the liquid state to the vapor state at ambient temperature and pressure in comparison to a given substance (e.g. water). pH. A value representing the acidity or alkalimity of an aqueous solution (Acidic pH = 1; Neutral pH = 7; Alkaline

'nĤ≒ 14) PERCENT VOLATILE: The percentage of the product (liquid or solid) that will evaporate at 212°F and ambient pressure. SOLUBILITY IN WATER: A description of the ability of the

product to dissolve in water.

# SECTION VII: REACTIVITY DATA

HAZARDOUS DECOMPOSITION; Breakdown products expected to be produced upon product decomposition or fire. INCOMPATIBILITY: Material contact and conditions to avoi to prevent hazardous reactions

POLYMERIZATION: Indicates the tendency of the product' molecules to combine in a chemical reaction releasing ex cess pressure and heat.

STABILITY: Indicates the susceptibility of the product-to spontaneously and dangerously decompose.

# SECTION VIII: SPILL AND DISPOSAL PROCEDURES

RCRA WASTE NOS: RCRA (Resource Conservation and Re-covery Act) waste codes (40 CFR 261) applicable to the disposal of spilled or unusable product from the original container

SECTION X: TRANSPORTATION DATA

# **CWA: Clean Water Act**

RO: Reportable Quantity - The amount of the specific incre AG: Reportable Quantity - the amount of the specific ingre-dient that, when spilled to the ground and can enter a storm sewer or natural watershed, must be reported to the National Response Center, and other regulatory agencies. TSCA: Toxic Substances Control Act.~ a federal law requir. ing all commercial chemical substances to appear on ar Inventory maintained by the EPA

# DISCLAIMER
