CAUTION. Unmixed oxidation hair colors are eye irritants. When oxidation hair colors are mixed with developers (hydrogen peroxide), the mixture may cause severe irritation and possible permanent eye injury.

#### Skin Contact:

May cause skin irritation or sensitization in sensitized individuals.

#### Inhalation:

Inhalation of ammonia vapors may result in respiratory irritation.

#### Ingestion:

Moderately toxic.

### 2. Effects of Chronic Exposure

A composite mixture of oxidation dyes has been tested in prolonged topical exposure studies of laboratory animals. No adverse effects on growth, reproduction or general health were observed. In topical studies no target organ toxicity was observed other than limited effect on treated skin.

### Ventilation:

Exhaust system ventilation should be adequate to avoid buildup of vapors.

### Hand Protection:

Use impervious gloves to avoid possible skin irritation/sensitization.

### Eye Protection:

Avoid contact with eyes. Use protective eyewear, if splashing is possible.

### Other Types of Protection:

Not applicable.

### Respiratory Protection:

Avoid inhalation.
